

## Project Design Phase-I Solution Architecture

|               |   |
|---------------|---|
| Date          | 19 September 2022                               |
| Team ID       | PNT2022TMID52571                                |
| Project Name  | Project - Smart Fashion Recommender Application |
| Maximum Marks | 4 Marks   |

Application built over three levels

### 1. User level

- User Interface
- Inputs as requirements
- Output as recommendations

### 2. Middle level

- Inputs received through chatbot
- Communication with server
- Results obtained from server update in UI

### 3. Back-end

- Receive query
- Process query
- Recommend fashion based on information from database
